d) Business phone number	
e) Mobile phone number	0939056732
f) Fax:	
g) Email:	c1nhonnghia1.phongdien.cantho@moet.edu.vn

“NHON NGHIA 1 PRIMARY SCHOOL_ THE ECO -SCHOOL”

Based on the construction an ecological school, all the teachers of Nhon Nghia 1 primary school surveyed real situation of the school. We have been planting many trees, vegetables to cover 100% cultivated surface. To carry out the duty of Can Tho Education and Training of construction an ecological school, Nhon Nghia 1 Primary school decided to build “ The eco-school”. There are many , trees, flowers, vegetable garden and orchard in school area. For many years, Nhon Nghia 1 Primary school has translated theory in to practice to help students

improve their living skills such as: creative skills, research skills, learning skills, collaboration skill by building an ecological school.

Plants and vegetables in “ Vegetable garden”

Our school also has “ Green library”, has been built by Mr Nguyen Huu Tuan for many years. In “ Green library”, things to keep books are made of waste materials such as old water pipes.... These materials are very cheap. These pipes can keep books and the librarian hangs them on the trees. Students can read books whenever they can.

Reading books under the shadows.

Around the school, there is a 200 m² vegetable garden. Many vegetables are grown to provide greens for the kitchen of our school. Besides, we have planted many herbal such as basil , catawissa , lemon grass , spiritweed: , elsholtzia to treat some common diseases.

Teachers and students take care of vegetable garden

- Besides, each class creates more flower pots hanging in front of classrooms. As well as taking care of and renovating the plants and flower beds were assigned.

Many flowers are grown.

- “Ecological school” is integrated by teachers in the content of teaching outdoor teaching classes to forge appropriate life skills for students with each subject, ...

Students study, play game under the shades.

Model “ the eco-school” of Nhon nghia 1 Primary school has an important meaning in concretizing the study with practice, education combined with productive labor, theoretical knowledge associated with practice. At the same time, for students to use theoretical knowledge into real life, to help them actively participate in extracurricular activities to experience real life, practice life skills and environmental protection, building school landscape, contributing to promoting the quality of education for students in the school.

Teachers and students are cleaning the school yard.

Between the theory and practice, students always practice to know the knowledge in their real life. They know how to keep our environment clean, stay healthy, decorate their classroom, tell their family how to build a beautiful, green, bright school. These things make an Ecological school.

Some activities of students at Nhon Nghia 1 Primary school.
